

The extent of your ambition.

Welcome!

Did you know that 47% of all millennials in America are practicing some level of freelance work?

Ambit is a platform for college students to share their talents with each other, so they can build their professional skills and gain valuable experience working in a freelance environment before they graduate college.

This PDF will guide you through the key functions of Ambit.

ambit

To create an account on Ambit, you must have a university email address.

This ensures that the other users you might meet through Ambit are guaranteed to be college students, just like you.

In viewing someone's profile, you can see their skills, who has recommended their skills, any of their group activity, and some sample portfolio pieces.

Photography ☆7

I've been doing a lot of portrait photography, lately.

Let me know if you need a professional headshot!

Jesse Pruitt liked Photography

Jane helped me improve my own photography skills. I had no experience with portrait photography, and she gave me a quick crash course in composition and editing!

Ben Spiele liked Photography

Jane helped me improve my own photography skills. She takes great portraits as well! She is super cool and delightful to work with!

Alice March liked Photography

Jane and I have worked together a few times now, and everytime, I'm just so impressed with her work ethic and the quality of the work she creates!

App Development

We bring together visual and technological aspects of app design. We don't always have time for every project, but we're still interested in hearing any and all ideas!

Playlist Sharing App

1/2

This is the first app that we fully designed and released together. It's an app for people to create playlists across multiple different music platforms, and then share them with their friends.

Ambit is not meant to facilitate the work of its users, rather it's simply a place to meet other talented individuals near you. If you find someone you'd like to work with, click the 'mail' icon to send them an email.

The intention of Ambit is that users work for free, to gain experience, much like an internship. This lack of transactions also gives students the freedom to work on whatever they wish, with no obligations.
